

AYINDE PEROUZA

Trinidad and Tobago | 868.718.7205 | ayinde.perouza@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

An adaptable, hands-on individual with experience supporting enterprise users across multiple business units in fast-paced, SLA-driven environments. Demonstrates strong troubleshooting, analytical thinking, communication, and problem-solving abilities, with a focus on reliable service delivery, secure IT operations, and continuous professional development.

CORE TECHNICAL SKILLS

Systems & Endpoint Administration	Windows Server; Windows 10/11; workstation setup and troubleshooting; software installation; patching support; printer/peripheral support; remote support; PowerShell/CMD; Linux CLI.
Microsoft 365 & Identity	Microsoft 365 Admin Center; Active Directory; Microsoft Entra ID; user provisioning; onboarding/offboarding; password resets; groups; permissions; mailbox and access requests; least-privilege concepts.
Networking & Connectivity	TCP/IP; IP addressing; DNS; DHCP; Wi-Fi; LAN/WAN troubleshooting; VPN concepts; VoIP; network service validation; Wireshark and tcpdump basics.
Security & Endpoint Protection	Microsoft Defender and antivirus monitoring; endpoint protection; access control; password hygiene; baseline hardening; vulnerability-management concepts; incident documentation and escalation.
Operations & Documentation	Ticket logging, tracking and escalation; SLA support; knowledge base/SOP documentation; asset/inventory support; vendor coordination; audit-ready notes; analytical troubleshooting and workload prioritization.
Recovery & Cloud Fundamentals	Backup/recovery concepts; VMware snapshots; system restore planning; Microsoft Azure fundamentals training; cloud-based services and endpoint-security concepts.

EDUCATION

BSc in Computer Science - London Metropolitan University | 2022

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cyber Defense Technician (CDT) - 2026 | Verify Credential
- Fortinet Certified Associate in Cybersecurity - 2025
- Google Cybersecurity Professional Certificate - 2024
- Microsoft Azure Fundamentals - Internal Training - 2024
- ISC2 Certified in Cybersecurity (CC) - 2023
- EC-Council Network Defence Essentials (NDE) - 2023

PROFESSIONAL EXPERIENCE

Service Desk Analyst

Bermudez Group Limited | Oct 2023 - Present

- Provide first- and second-line technical support across eight operating companies (OPCOs), supporting Microsoft 365, Active Directory, Entra ID, Windows endpoints, printers, business applications, connectivity and user access issues.
- Administer user and access requests including provisioning, onboarding/offboarding support, password resets, group membership changes, mailbox access and permission updates in accordance with internal approval procedures.
- Troubleshoot hardware, software, authentication, email, endpoint and network-connectivity issues; record actions, findings, resolution steps and escalation notes in the service desk system.
- Support endpoint configuration and security through patching assistance, Microsoft Defender and antivirus review, Group Policy-related troubleshooting, application setup and secure workstation support.
- Log, track, prioritize and escalate support requests while maintaining SLA-focused communication with users, infrastructure teams, vendors and business stakeholders.
- Maintain technical documentation, troubleshooting notes and knowledge-base information to support repeatable processes, handovers, audit readiness and consistent service delivery.

FTTH Technical Support Technician, Tier 1 & Tier 2

Digicel Trinidad and Tobago Ltd. | Aug 2017 - Jun 2023

- Provided high-volume technical support for broadband, VoIP, customer-premises equipment and network service issues in an SLA-driven environment.
- Troubleshoot connectivity using IP addressing, DNS symptoms, modem/router status, signal and service validation, outage checks and structured remote-support procedures.
- Escalated complex incidents to network operations, field teams and internal support groups with clear case notes, customer updates and handover details.
- Identified recurring service-impacting patterns, documented symptoms and coordinated with internal teams to support efficient service restoration.

IT Technician

Matthews' Air Conditioning | Nov 2012 - Aug 2017

- Installed, configured and supported desktops, laptops, printers, local applications and basic network devices for business users.
- Performed first-line troubleshooting for hardware, software, connectivity and peripheral issues.
- Maintained hardware/software inventory and documented recurring technical issues to improve support continuity.

SELECTED SYSTEMS ADMINISTRATION & SECURITY PROJECTS

Windows Enterprise Administration & Security Lab

- Built and administered a Windows Server Active Directory environment with AD DS, DNS, DHCP, Group Policy, Windows clients, user/group management, permissions and access-control testing.
- Implemented and validated a two-way transitive forest trust between TT.WI.LOCAL and BB.WI.LOCAL, including DNS troubleshooting, conditional forwarding, trust verification and cross-domain authentication.
- Practiced helpdesk delegation, policy enforcement, domain troubleshooting and enterprise documentation using PowerShell and native Windows administration tools.

Ubuntu Application Server Secure Baseline & Recovery - 2026

- Administered and hardened an Ubuntu 24.04 application server in VMware: hostname and network configuration, package updates, repository trust correction, UFW firewalling, OpenSSH hardening and automatic security updates.
- Recovered safely from a GRUB bootloader configuration issue, validated the upgraded kernel, corrected Netplan interface configuration, verified DNS/default-route health and created VMware recovery snapshots.
- Documented system inventory, validation evidence, residual risks and recovery recommendations using a structured change-and-test workflow.

Security Operations, Monitoring & Vulnerability Management Lab

- Used Splunk, Security Onion, Elastic/Kibana, Wireshark and tcpdump to review alerts, network activity and simulated security events, reinforcing monitoring, troubleshooting and incident-escalation skills.
- Practiced vulnerability-management, endpoint-hardening, access-control, patching and reporting concepts applicable to day-to-day systems administration and cybersecurity support.
